

Antacids

We will sometimes recommend antacids to help us to discern whether your baby's symptoms are due to acid. These medicines are meant for VERY short term use. Short term use is why we are not worried about the exposure to the active ingredients, inactive ingredients or flavors. If these meds seem useful we will want to talk very soon about longer term and safer acid control.

Mylanta Maximum Strength Liquid Antacid/Anti-Gas

Maalox Advanced Regular Strength Antacid (***not Maalox Total Relief***)

CVS Health Maximum Strength Antacid Liquid Original

Walgreens Antacid Liquid Regular Strength

Gaviscon Liquid Antacid Regular Strength,
