

Flu vaccine in the age of Covid 19

We, now, have preservative free influenza vaccine available. We have been vaccinating patients who have been coming in for their well visits. We are, now, ready to start vaccinating large numbers of children. Because of the Covid 19 pandemic we want to maintain high levels of safety for our patients and staff. Therefore, we will be vaccinating the children, who do not have appointments for a visit, outside in a recently erected tent. We will, still, do this by appointment, only. Please call the office to make your flu appointments.

On arrival to the office at your appointed time you may walk up to the influenza vaccine tent and announce your arrival.

(If no one is at the influenza vaccine tent when you arrive you may text us at 202-798-4170 and somebody will be out promptly)

If there is a line please maintain social distancing. Masks, for everyone 2 and older, are still required for the safety of our employees and other patients. Since we are vaccinating large numbers of children, once your vaccine has been administered please do not linger and make room in the parking lot for others. In case of inclement weather, let the tent nurses know you are here and you may wait in your car until we are ready to vaccinate.
